## What is Matcha?

Matcha is a type of green tea powder. It is made of the youngest, finest leaves that were carefully handpicked and ground slowly to ensure that it retains its high nutritional value.

Good for  
Mind &  
Body :)

# How is Matcha made?

## 1. Shading before harvest

Slowing down growth and making tea leaves greener and less bitter.

## 2. Steam Fixation | Drying

Killing enzyme by steaming to make tea leaves stay green and taste better. Then the leaves are dried and frozen to increase glucose (sweetness) level.

## 3. Cutting/ Screening

The finest tea leaves will be kept for making Tencha which is the raw material of the next step.

## 4. Grinding

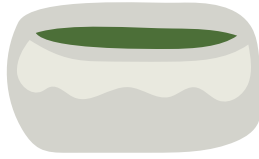

Tencha is carefully ground by the stone mill to prevent heating by friction so as to make high quality Matcha.
